ALEX PEDRERO ANDRADE

Senior Design Engineer

+1 306 880-8875 g.alex.andrade@gmail.com Saskatoon, SK - Canada

SUMMARY

Accomplished Engineer with 15+ years of technical leadership, specializing in the intersection of high-fidelity UI/UX and scalable frontend architecture. Founding architect of Sous Chef, a comprehensive Design System built from the ground up to unify design and engineering at scale. Proven track record in transforming fragmented UI libraries into mature, accessible, and high-performance component ecosystems using React, TypeScript, and Storybook. A "No-Ego Doer" with a deep focus on Developer Experience (DX) and the craft of polished, interactive web experiences that bridge the gap between brand vision and production-ready code.

EXPERIENCE

Senior Design Engineer — 01/2026 - Present

7shifts — Saskatoon, Canada

- **Design System Evolution:** Leading the technical evolution of the **Sous Chef** design system, transitioning it into a multi-platform ecosystem optimized for designers, developers, and AI-driven automation.
- **Dark Mode Architecture:** Orchestrated the end-to-end implementation of the platform's most requested feature by engineering a scalable **semantic color token system** across a complex, multi-team codebase; this initiative significantly improved accessibility and satisfaction for night-shift managers, our core user demographic.
- **Infrastructure & Tooling:** Championed the design system's core infrastructure using **Storybook** and **Chromatic**, establishing high standards for visual regression testing and component documentation to ensure a "consumer-grade" experience.

Senior Frontend Engineer — 02/2022 - 12/2025

7shifts — Saskatoon, Canada

- **Design System Architecture:** Working on the **Developer experience team**, I led the planning and foundational architecture of the Sous Chef component library, transforming a fragmented shared-folder structure into a scalable, accessible, and themeable system used by multiple product teams.
- **Developer Enablement & Mentorship:** Established and led internal frontend learning groups, fostering a "No-Ego" culture of continuous improvement by mentoring peers on React best practices, TypeScript standards, and advanced testing strategies.
- **Tooling & Workflow Optimization:** Integrated **Storybook** and **Chromatic** into the CI/CD pipeline, automating visual regression testing and reducing design-to-production friction across the organization.
- **Technologies:** React, TypeScript, Storybook, Chromatic, Jest, React Testing Library, GitHub Actions.

Senior Frontend Engineer — 11/2021 - 02/2022

Living Skies Technologies — Saskatoon, Canada

- **Frontend Architecture Recovery:** Rescued a failing frontend application by auditing the core architecture and implementing a robust development foundation that resolved critical stability and performance issues.
- **Quality Infrastructure:** Led the migration from pure JavaScript to **TypeScript** and introduced the **Testing Trophy** methodology, balancing static analysis, unit, and integration tests to eliminate regression bugs.
- **Rapid Product Launch:** Established a **TDD culture** and mentored the engineering team on modern frontend best practices, enabling a successful product launch within 60 days and allowing the team to shift focus to feature scaling.
- **Technical Impact:** Transformed a high-friction codebase into a scalable system, providing the technical confidence necessary for the startup to reach its first major release milestone.

KEY ACHIEVEMENTS

Design System Architect

Architected Sous Chef DS, eliminating UI redundancy and enabling teams to ship features faster.

UX & Accessibility Champion

Delivered Dark Mode, the #1 customer-requested feature, improving accessibility and usability for night-shift managers.

Community & Engineering Culture

Founded the Saskatoon React Meetup and led internal frontend guilds, bridging the gap between local tech communities and internal engineering growth.

Design-to-Engineering Bridge

Integrated Storybook and Chromatic into the CI/CD pipeline, automating visual regression testing and reducing design-to-production friction for product teams.

SKILLS

Design System • React • TypeScript •

Storybook • CSS • Chromatic •

Technical Leadership •

Community builder • Accessibility

CORE COMPETENCIES

Design System Architecture

Creates scalable UI systems that bridge design and code, ensuring consistency and accelerating feature delivery.

Developer Experience

Builds intuitive tools and standards that empower engineers to ship high-quality code faster and with more confidence.

EXPERIENCE

Fullstack Software Engineer — 01/2019 - 10/2021

7shifts Inc — Saskatoon, Canada

- **Core Feature Migration:** Partnered with a cross-functional team (Design, Product, and Marketing) to lead the architectural migration of the **Scheduling Page -** the company's core product domain—from PHP-rendered templates to a high-performance **React SPA**.
- **Complex State Management:** Engineered a robust frontend architecture to handle complex, real-time data interactions, significantly improving application usability and reducing time-to-market for subsequent feature releases.
- **Fullstack Lifecycle Ownership:** Managed the end-to-end delivery of product features, from database optimization and API endpoint development in **PHP** to the implementation of polished, interactive UI components in **React**.

Software Developer — 01/2015 - 12/2018

Totvs — Joinville, Brazil

- **Enterprise Systems Development:** Contributed to the development of large-scale ERP solutions at the largest software company in Latin America, focusing on aligning complex system capabilities with diverse customer requirements.
- **Large-Scale Collaboration:** Partnered with multi-disciplinary teams to engineer and maintain high-availability software used by thousands of corporate clients across South America.
- **Technical Versatility:** Leveraged a wide range of technologies including **Spring Boot, Angular 4, and Ionic** to build and optimize cross-platform business applications.
- **System Optimization:** Proactively identified and resolved performance bottlenecks in legacy modules, ensuring the ERP system remained resilient and responsive to growing user demands.

System Analyst Developer — 03/2010 - 12/2014

Metalúrgica Schiffer SA — Ponta Grossa, Brazil

- **Process Automation:** Spearheaded the development of internal web applications to automate manual data entry and streamline daily departmental workflows.
- **ERP Customization:** Maintained and optimized core ERP modules, designing custom reports and data forms to bridge the gap between business requirements and technical functionality.
- **Early Technical Foundation:** Built a versatile skill set in full-stack development using **PHP, HTML, CSS, JavaScript, and Java SE**, applying these tools to solve real-world industrial business challenges.

EDUCATION

Analysis And System Development — 08/2010 - 12/2014

Federal Technology University Of Paraná (UTFPR) — Brazil

Computer Technician — 01/2009 - 06/2010

SENAI — Brazil

PROJECTS

Saskatoon React Meetup Organiser — 01/2023 - 01/2025

- **Community Pioneering:** Founded and scaled the first official React Meetup in the Canadian Prairies, establishing a hub for frontend innovation and professional networking in the region.
- **Knowledge Sharing & Leadership:** Curated technical content by recruiting industry speakers and delivering original talks on React architecture, design systems, and frontend best practices.
- Link to the LinkedIn post of our first meeting, click here.

EVENTS

React Summit NY - 2025

Engaged with industry leaders like **Addy Osmani** to discuss web performance and scalable architecture, bringing global best practices back to the 7shifts frontend.

TRAINING / COURSES

Epic React

Kent C. Dodds

Testing JavaScript
